driven by technology

# ASSEMBLY TOOL FOR HSK CLAMPING SETS

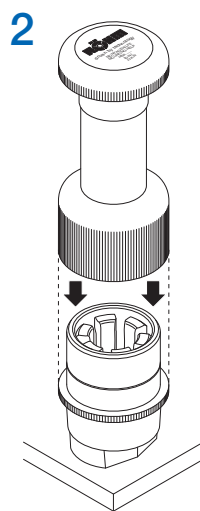

Ease of handling, rapid operation and reliable functionality – that sums up what RÖHM was aiming for in developing its new assembly tool for HSK clamping sets, and the result is a resounding success. Now just a few swift operations are all it takes to assemble clamping sets on the spindle quickly and reliably.

## BENEFITS AT A GLANCE

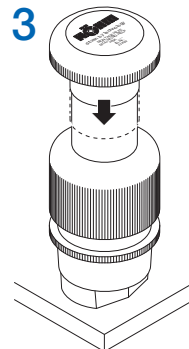

- ⌚ Massive time saving as assembly of the clamping sets only takes seconds
- 🛡️ Avoidance of damage to the clamping set and spindle
- 👤 User-friendly and reliable handling of the assembly tool

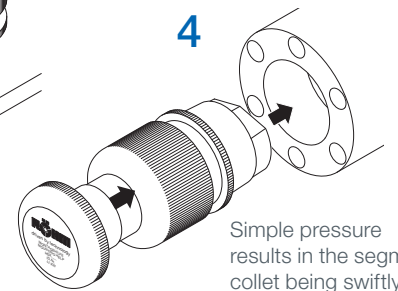

Insert segment collet in assembly tool

Close assembly tool

Pre-positioning of the segment collet

Simple pressure results in the segment collet being swiftly and reliably mounted on the spindle shaft
