

DIE GRINDING UNIT

BY FLEXARM INC

The FlexArm Die Grinding Arm allows precision die repair in a fraction of the time.

It is engineered to maintain perpendicularity at any horizontal or vertical location. A piloted carbide deburring tool allows the precise removal of weld, ensuring near perfect die repair. The addition of a magnetic base allows for maximum portability, simply move the Die Grinding Arm to the mold, attach the base to any surface, and be repairing in seconds.

Model	Reach
S-36-GBM	14" - 42"
